ABC® Dissecting Probes

ABC® technology in contact mode allows surgeons to efficiently dissect while employing the benefits of Argon. Surgeons can also continue to use ABC® in non-contact mode simply by pulling the ABC® Dissecting Electrodes away from tissue.

Simple to use, ABC® Dissecting Electrodes attach to any of the below CONMED ABC® handpieces to convert from Argon Beam Coagulation to Argon Dissect.

- 130342 Lap Foot Control 10mm ABC Probe
- 130344 Single Function Hand Control ABC Handpiece
- 130345 Angled (45°) ABC® Foot Control Handpiece
