

# Your One-Stop Shop for ECG Electrodes, MFE Electrodes, and EEG Electrodes

ALL-PURPOSE

PEDIATRIC

RESTING

SPECIALTY

To learn more about these and other innovative products,  
call **866-4CONMED** or visit [www.CONMED.com](http://www.CONMED.com).

## General, All-Purpose Electrodes:

### TOTALTRACE®

Versatile and reliable, TotalTrace® electrodes offer exceptional conductivity and adhesion for a wide range of applications.

### SURETRACE®

Designed for consistent performance, Suretrace® electrodes ensure reliable ECG signals in diverse patient populations.

### CLEARTRACE™ 2

Featuring a clear adhesive gel, Cleartrace™ 2 electrodes provide excellent adhesion and patient comfort, making them ideal for extended monitoring.

## Pediatric/Neonatal Electrodes:

### NEOTRODE®

Specifically designed for pediatric patients, Neotrode® electrodes offer gentle adhesion and optimal signal quality for accurate ECG readings.

### HUGGABLES®

With a soft design, Huggables® electrodes provide gentle skin contact, making them ideal for neonatal patients.

### SOFRACE®

Softrace® electrodes feature a flexible design and soft adhesive gel, ensuring comfort and reliability for pediatric and neonatal applications.

## Resting Electrodes:

### FASTRACE

Engineered for resting ECG applications, Fastrace electrodes offer fast and easy application with reliable signal transmission, enhancing patient comfort and efficiency.

## Specialty Electrodes:

### ECG BACKPADS

Designed for specialized applications, ECG Backpads provide consistent signal quality and optimal patient comfort, making them ideal for specific diagnostic procedures.
