

# Seat the Anchor, Set the Tension with **PopLok®** Knotless Suture Anchors

The PEEK PopLok® Knotless Suture Anchors provide reliable soft tissue-to-bone fixation with a reproducible technique. To maximize flexibility, its innovative design allows surgeons to adjust suture tension **after the anchor is seated in the pilot hole**.

- Suture tension is adjustable after anchor is seated in the pilot hole
- Suture locking mechanism decreases reliance on bone-anchor interface
- Sub-cortical wings provide strong fixation
- Tactile and audible “POP” confirms deployment

**Secure your repair with PopLok®!**
